Microbial inoculants to improve crop establishment and crop quality

- *Increases the activity of N-fixers, P-solubilizers and plant growth bacteria*
- *Increase new feeder roots in 10-15 days*
- *Improves crop tolerance to abiotic stress*
- *Best applied where contact is made with seed or actively growing roots*

CONTAINS NON-PLANT FOOD INGREDIENTS:

Purpose: The functions of the microbial inoculants are to improve crop vigor and root growth

General species only of the following:

Pseudomonas fluorescens = 300 million CFU/ml

Azospirillum brasilense = 300 million CFU/ml

Bacillus azotofixans = 300 million CFU/ml

Azotobacter chroococcum = 300 million CFU/ml

Pseudomonas putida = 300 million CFU/ml

Method of Application

Suggested rates per acre

	<u>Field Crops</u>	<u>Tree and Vine Crops</u>
In-furrow or Root Drench	4 oz / 120 ml	4 - 8 oz / 120-240 ml
Chemigation with 0.5 inch water	4 - 8 oz / 120-240 ml	4 - 8 oz / 120-240 ml

Backpack Sprayer: 2 tsp per gallon with normal irrigation period for three applications.

Note: This microbial product will not replace regular fertilizer nor pesticide programs required by agricultural crops.
